

ARGITIRAGE

Riddling additive especially for traditional riddling on racks

CHARACTERISTICS

Made of the purest montmorillonite (a bentonite) especially for traditional riddling on racks, **ARGITIRAGE** is easy to use.

Our know-how in the riddling additives guarantees a perfect regularity in the quality of the product and reliable, steady results.

OENOLOGICAL PROPERTIES

- **ARGITIRAGE** selectively adsorbs the unstable proteins of vegetable origin as soon as it is added to the wine to be bottled.
- The compounds from yeast autolysis and especially the proteins and mannoproteins will not be adsorbed and thus, will participate in foam stability.
- **ARGITIRAGE** is neutral and preserves the aroma of the wine.
- **ARGITIRAGE** forms homogeneous and compacted sediment that does not adhere to the glass and spreads little on the side walls of the bottles. This sediment can be shaken without occurrence of particles in suspension.
- The sediment is adapted for all riddling situations, manual or automatic.

APPLICATION RATE

6 to 8 cL/hL

INSTRUCTIONS FOR USE

ARGITIRAGE POWDER: Make a 6 % solution (1 kg for 16 liters). Use a high velocity stirrer. Sprinkle **ARGITIRAGE** over the needed volume of stirred water. Keep stirring for one hour.

The suspension obtained should be used within 12 hours.

ARGITIRAGE LIQUID is directly used after shaking the jerrycan.

Incorporation :

Add 6 to 8 cL/100 liters to the wine to be bottled after diluting with 50 % water half an hour before bottling. The use of a dosing pump or an injector is recommended.

Keep stirring the wine after incorporation.

A prior addition of **BOLTANE TIRAGE** improves compact settling and riddling.

Reminder : A riddling additive should flocculate in the bottled wine, the volume of the deposit depends mainly on the method of incorporation in the volume of wine to be bottled.

The addition of **ARGITIRAGE** should be the last stage of the bottling process.

Precaution for use :

For oenological and specifically professional use.

Use according to current regulation.

INGREDIENTS

ARGITIRAGE POWDER : Natural sodium-montmorillonites (90 %)

ARGITIRAGE LIQUID : solution to 6 % of ARGITIRAGE POWDER, SO₂ E228 (1 - 1,5 g/L)

PACKAGING

ARGITIRAGE POWDER :

1 kg bag

ARGITIRAGE LIQUID :

1 L bottle

10 L jerrycan

STORAGE

Store unopened package away from light in a dry and odourless area. Store away from frost.

Opened package: use rapidly.

Use before the best before date (BIUB) stamped on package.
